DETAILED ACTION

Claim Rejections - 35 USC § 102/ 35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4,7,8,10,12-18,21-24 and 58-62 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Leonhardt et al for the same reasons as urged in the action of 10-10-00.

Response to Arguments

Applicant's arguments filed 3-28-02 have been fully considered but they are not persuasive. Applicants argue in the 4th full paragraph on page 1 of their remarks that "Applicants are unable to find ... 'print' ... in the entire Leonhardt et al reference". The examiner is not convinced by this argument since Leonhardt et al at col. 2, lines 9 and 10 disclose a method for mechanically stamping the servo tracks on the optical disk and stamping is a form of printing.
